Overview

This directory identifies opportunities for high school students to earn college credit in Indiana. It can be used to better inform high school administrators, counselors, and teachers who are exploring dual credit partnerships with postsecondary institutions and to identify additional opportunities for their students to earn college credit while still in high school.

The Center of Excellence in Leadership of Learning (CELL) intends for the directory to be inclusive of many types of programs that offer the opportunity for high school students to earn college credit. Programs have been organized into seven different categories:

- **Concurrent Enrollment:** A high school or career center teacher approved by a postsecondary institution offers a college course in the high school or career center classroom (typically during the regularly scheduled school day) for which a student can earn both secondary and postsecondary credit.
- **College Instructor at High School:** A postsecondary instructor teaches a college course solely to high school students in the high school or career center classroom (typically during the regularly scheduled school day).
- **On Campus Enrollment in Classes with College Students:** A high school student attends a college course taught by a postsecondary instructor alongside traditional postsecondary students on a college campus (including satellite locations, such as evening classes in high school buildings).
- **On Campus Enrollment in Classes Solely for High School Students:** A postsecondary institution offers a course on the college campus specifically for high school students, taught by a postsecondary instructor (including Summer Bridge and Upward Bound programs) where postsecondary credit is offered.
- **Distance Education:** A high school student participates in a distance education course for postsecondary credit, including online, videoconference, and correspondence courses. This includes those taught by a postsecondary instructor or secondary instructor approved by the postsecondary institution.
- **Early College High School:** High schools paired with a postsecondary institution that target students traditionally underrepresented in postsecondary education and allow them to simultaneously earn a high school diploma and an Associate's degree or up to two years of credit toward a Bachelor's degree. Only the three Endorsed Indiana Early College High School model sites are included in this directory at this time.
- **Project Lead the Way:** Project Lead the Way is a non-profit organization that offers rigorous high school courses in science, technology, engineering, and mathematics (STEM). Some postsecondary institutions have created dual credit programs that allow students to earn both college credit and high school credit through Project Lead the Way courses in a concurrent enrollment arrangement.

Institutions reported that they have programs *under development* are identified as such, as well as those without formal programs but which have *customized arrangements* with a few schools or are willing to discuss customized arrangements with individual schools. In addition, several institutions did not respond to requests for current/updated information. Such schools are indicated by a ○ in the listings on pages 6-16.

This directory includes all programs that CELL has identified as of March 13, 2012. Please send all additions, corrections, updates, and advice to Janet Boyle at 317-791-5990, boylej@uindy.edu or by fax to 317-791-5925.

Preferred Dual Credit Provider List: Courses Taught by High School Teachers in a High School Setting

The *Policy on Dual Credit Opportunities in Indiana* approved by the Commission for Higher Education last year calls for postsecondary institutions offering dual credit courses to “demonstrate ongoing adherence to this policy and NACEP [National Alliance of Concurrent Enrollment Partnerships] standards” and “be subject to state reviews conducted on a periodic (and as needed) basis by a standing subcommittee of CHE’s Statewide Transfer and Articulation Committee (STAC).”

At its June 2011 meeting, the Commission received an update on how these components of the *Policy* were being implemented, the result of which would be a recommendation to the Commission to approve a list of preferred dual credit providers at its December 2011 meeting. The Commission was also informed that the list will be made public and shared with the Indiana Department of Education, in order to provide guidance to high school counselors in advising students and parents on making decisions for dual credit programs.

The implementation process described in June consisted of three steps. First, a Dual Review Credit Subcommittee of STAC was formed to apply the NACEP standards to all institutions offering dual credit courses, beginning with those standards that were deemed to be most critical and could be implemented readily. Second, institutions would gather evidence to demonstrate adherence to the NACEP standards. Third, the evidence provided would be reviewed by teams consisting of various stakeholders, including representatives from the public and independent institutions, high schools, the Department of Education, Independent Colleges of Indiana (ICI), the Center for Excellence in Leadership of Learning (CELL) at the University of Indianapolis, and Commission staff.

This process has now been carried out, and on November 30, 2011, the Dual Credit Subcommittee of STAC met and recommended that the Commission approve the list of preferred providers of dual credit (see attachment). Besides those institutions that have completed the state review process, the list includes those institutions that are accredited by NACEP.

In a related development, the Indiana State Board of Education met on November 7 and approved a proposed final rule on math and graduation requirements. The proposed rule, which will now go through the formal state rule-making process, includes the following statement: “It is recommended that schools offering dual credit courses on the high school campus use a dual credit provider from the Preferred Provider list as developed by the Commission for Higher Education.”

Once the list has been approved, Commission and Department of Education staff will work together regarding how to publicize it in the most effective, efficient, and coordinated manner. At the same time that the Preferred Dual Credit Provider List is publicized, information about other ways that high school students can earn college credit will also be publicized – such as enrolling in a course taught on a college campus, accompanied by a list of all Indiana institutions accredited by the Higher Learning Commission.

The Dual Credit Review Subcommittee will now turn attention to developing the next cycle of the review process, which will be carried out next year. The 2012 cycle will include opportunities for new institutions to be added to the preferred provider list.

Preferred Dual Credit Provider List: Courses Taught by High School Teachers in a High School Setting, December 1, 2011

Preferred Dual Credit Provider List: Courses Taught by High School Teachers in a High School Setting

December 1, 2011

There are several methods of delivering dual credit courses which are available to Indiana high school students.

The Universities/Colleges on the list below deliver dual credit courses offered in the **high school**. These classes are taught **by high school teachers** to **high school students** throughout the regular **high school day**. These University/College dual credit programs have received accreditation through the National Alliance of Concurrent Enrollment Programs (NACEP) or through the state review process.
