Participants will engage in a comprehensive series of six full days of training covering the ASCA National Model, the use of data in school counseling, and evidence-based practices to close the achievement gap and increase students' college and career readiness.

Attendees will collaborate to co-create the foundational components of an ASCA-aligned School Counseling Program Handbook that defines the school counseling program within local school corporations. **Registration in working teams that includes school counselors and a school administrator is encouraged.**

“The Academy was awesome! While I have been a school counselor for 27 years and 37 years in the counseling field, this is the most exciting training I have attended myself—it will help me bring awesome experiences to our students!”
